Number grid

In order for children to be really confident with handling numbers it is very important that they have a great deal of practice in counting forwards and backwards.

To re-inforce place value counting on and back in ones, tens, hundreds and thousands is especially worthwhile.

A number line is very useful in helping with this.

Below is a 10 - 1000 number grid which many children will find useful to refer to when counting in tens. It then continues past the thousand, which is the 'tricky' part!

10	20	30	40	50	60	70	80	90	100
110	120	130	140	150	160	170	180	190	200
210	220	230	240	250	260	270	280	290	300
310	320	330	340	350	360	370	380	390	400
410	420	430	440	450	460	470	480	490	500
510	520	530	540	550	560	570	580	590	600
610	620	630	640	650	660	670	680	690	700
710	720	730	740	750	760	770	780	790	800
810	820	830	840	850	860	870	880	890	900
910	920	930	940	950	960	970	980	990	1000

Then, carrying on in tens:

1 010	1 020	1 030	1 040	1 050	1 060	1 070	1 080	1 090	1 100
1 110	1 120	1 130	1 140	1 150	1 160	1 170	1 180	1 190	1 200
1 210	1 220	1 230	1 240	1 250	1 260	1 270	1 280	1 290	1 300
