Using each of the digits from 1 to 9, once only, place them in the stars on the sides of the Christmas tree so that each side adds up to the same total.

1 2 3 4 5 6 7 8 9

There are several answers to this. Below is one example. The total is 20 in this case and the numbers on each side could move position

1 2 3 4 5 6 7 8 9
